ESI Energy Services International Announces Appointment of Roy Rogers as Operations Manager – Houston Drilling Systems

HOUSTON, TEXAS - January 30, 2007 – ESI Energy Services International announced Roy Rogers has joined the company as Operations Manager – Houston Drilling Systems. In this position, Rogers will be responsible for managing the company's Houston operations. The 40,000 sq. ft. Houston facility provides after-market repair and recertification services for capital drilling equipment including drawworks, mud pumps, blowout preventers, top drives and rotary and traveling equipment. All services are carried out in accordance with American Petroleum Institute ("API") standards and specifications.

Rogers brings with him nearly thirty-five years of experience in the drilling equipment industry. He has extensive knowledge of drilling equipment, cranes and jacking systems. His experience will greatly enhance the company's ability to provide world class products and services to our customer base.

About ESI Energy Services International, Inc:

ESI Energy Services International, Inc. ("ESI") is a single source solutions provider for specialized Marine and Drilling Systems. Our Marine Systems group is the largest independent provider of complete jacking systems, components, and services in the industry, and our Drilling Systems group provides complete in-house aftermarket services for your critical capital drilling equipment. Headquartered in Houston, Texas, these services are provided from locations in Texas, Louisiana, Mississippi and Dubai, U.A.E.
