- Kelly Spinners & Bushings
- Master Bushing & Split Bowls
- Pipe Torque Wrenches
- Ring Grooves – Stainless Steel & Alloy
- Shale Shakers
- Sub-Sea Adapters
- Tongs
- Transmission Cases

MANUFACTURING AND FABRICATION

Through our fully integrated manufacturing facilities, ESI can provide complete unitization and power conversions for your drilling equipment. We have the engineering expertise to design system conversions and unitizations to meet your specific needs. Drawworks power conversions, mud pump upgrades and unitizations and rotary unitizations are carried out in our facilities without the need for third

party assistance. This insures our ability to control the manufacturing and fabrication process.

In addition to equipment conversions and unitizations, we manufacture a wide range of API and ANSI spools, adapters, and flanges, choke and kill manifolds, and high pressure drill through accessories for drilling and workover applications.

REPAIR AND RECERTIFICATION

ESI offers the very best in specialized oilfield equipment repair, refurbishment and recertification. With our fully integrated manufacturing capabilities and technical support group, we provide cost effective solutions in a timely and efficient manner. Every project is reviewed by our technical support

staff, and a detailed proposal outlining the scope of work is presented. Once approved, the work is carried out in accordance with API approved procedures, and the customer receives a comprehensive data book documenting every aspect of the repair/refurbishment/recertification process.

FIELD SERVICE

ESI provides a full range of rig site equipment repair services. Our technical support and service personnel have over one hundred and twenty years of combined experience and are available to travel worldwide to meet your service needs.

We offer inspection and maintenance programs designed specifically for your rig fleet and will assist in the development of a comprehensive long term plan designed to reduce downtime and overall maintenance costs.
